PROFILE

Motivated Artificial Intelligence undergraduate and Web Developer with hands-on experience in Python, automation, and AI-powered systems. Experienced in building real-world applications including chatbots, automation workflows, ledger systems, and student-facing platforms. Strong interest in applied AI, workflow automation, and intelligent web systems with a proven ability to convert ideas into working products.

WORK EXPERIENCE

Nextech Skills

JULY 2025 - AUGUST 2025

Web Developer Intern

- Worked as a Web Developer Intern building the following projects
 - Developed Matric and Intermediate program pages for the official Nextech Skills website with a focus on clarity, responsiveness, and student usability.
 - Designed and implemented a student chatbot using Python to handle academic queries, admissions information, and FAQs.
 - Built a Fee Challan Management System enabling automated challan generation and fee tracking for students.

PROJECTS

About Me CV Generator (Placement Bureau - TUF)

- Built an automated CV generation system using Python and Streamlit that allows users to input personal and academic details to instantly generate a structured CV.
- Integrated AI assistance using LLM for intelligent content formatting and enhancement.

Automated Financial Operations (AI CFO)

- Designed an automation workflow to assist in financial tracking
- Simulated CFO-style decision support using structured financial input which is built using N8N and Open AI

Virtual Try On

- AI-powered fashion tech solution enabling users to virtually try clothing items.
- Leverages Hugging Face Transformers and Fal AI API for real-time garment overlay

EDUCATION

Bachelors of Artificial Intelligence

2023-2027

School of business | Wardiere University

GPA: 3.8 / 4.0
